Approve for change cost

Jira Link: ✅ **FRAP-1463** - Approve for change cost **DONE DEVELOPMENT**

Prevent approval Review Inventory Card in two case

1. When change status TO " lost or cancelled " (approval of it JUST for Accounting Team)
2. When changing any cost (approval of it JUST for Accounting Team)

The role is for Omar: Lead Accounting Mng

I added this block of code to handlings it

```
    if not self.is_new():
            self._document_before_save = frappe.get_doc(self.doctype,
self.name)
            if self.status_card != self._document_before_save.
status_card:
                    if self.status_card in ('Lost', 'Canceled') and \
                            "Lead Accounting Mng" not in frappe.get_roles
(frappe.session.user):
                            frappe.msgprint("Please contact the tech support",
raise_exception=1,
                                            title="You Can't Approved this
document ", indicator='red')

            if self.card_cost != self._document_before_save.card_cost \
                    and "Lead Accounting Mng" not in frappe.get_roles
(frappe.session.user):
                    frappe.msgprint("Please contact the tech support",
raise_exception=1,
                                    title="You Can't Approved this document
", indicator='red')
```
